So many of us develop our intelligence and find out this doesn't directly translate into success. How is it people with worse qualifications can sometimes get the job? Emotional Intelligence or "EQ" is your ability to control your emotions, be empathetic to others and apply the right emotional leverage at the right time to get a desired outcome. Our emotions significantly affect our lives and so many of us fail to learn how to use them to change the results in our lives. It is also often it is our ability to connect with other human beings that gets us to where we want to go. In this book I will show you how to master this aspect of your life. I heard of the phrase emotional intelligence before couple years ago but never really gave it a chance to see how truly important it can be of my everyday life. There are lots of times where I am in certain situations where my emotion can play out of place and lead me to a road of confusion. Well, started reading this book and learned a whole of information about EQ that surely blew me away. This book takes the time to describe in detail about the importance of emotional intelligence and how it can be applied in all kinds of situations of a normal social life. Emotional intelligence has been found to be very important in determining our success in life. By reading this book and learning more about the issue, you may be able to increase your emotional aptitude, thus increasing your chances of a happy and successful life.

I thoroughly enjoyed this book and also found it really useful in helping me understand and improve my everyday interactions with the rest of the world. In some ways I was the ideal reader - strong in academic abilities, with a willingness to be convinced by reasonable argument, but less than successful in my relationships with other people. The book concludes with a hopeful look at the future and the possible fruits of research into brain plasticity and the promises of new technology. I enjoyed it!

Excellent! This was well written and very informative, Ian writes about many things which we are all aware of but may not know how to change. Now we do. It is a very helpful book if you want to really change your Emotional Intelligence and be more aware, more positive and happier. Really worth recommending!
