Customer Reviews

This book is full of ideas, for kids. These ideas, and suggestions, are great for the adults to know. It will cause better relations with the kids, because they will be happy, not BORED. All grandparents, and parents alike should have this on hand, at all times. It will teach through example, that money is not required, for true happiness.

Many of the Young Adults today who were raised with the electric baby sitter are now having children of their own. They don't know what to do because they don't want the electronic baby sitter for their children and yet they want them to be active but they just don't know where to start. This book is for you. This book will take you from the toddler age to the tween and there are things teens will love to do with younger siblings or when they are old enough to baby sit. One of the things I liked was the recommendation to read to your children. That is so important for a child. That gives your child the ability to see the story in their minds and not something that others want them to see which may not be appropriate. Another idea I liked was the section on cooking with your children. This will help your children in math, reading and more. It will also help them to feed themselves when they become adults.

If you are a mom of active and playful kids, this book is your life-saver! It gives helpful tips on how to keep your kids entertained on a budget which I think is a very good thing because you don't have to spend a lot of money to keep them happy. I highly recommend this book!

This guide is really helpful! I really liked the ideas that were shared in this book on how to find free and cheap activities for your kids. They are fun and they keep my kids entertained especially when they are bored. This is a good resource to work with. Your kids will love the activities and you will be happy to get them busy! I really recommend this to all parents who are looking for some creative ideas on how to entertain their kid/s.

I would probably recommend this mostly to young babysitters or the like. Most experienced parents will already have used many of the ideas in this book, some many times. That said, there were 2 or 3 decent ideas I had not thought of before that I will be trying. Overall the feeling I take away from this book is that it was a game effort but I am glad that I got it for free.

I choose this rating because there are some great ideas in this book for kids of all ages. I really like the balloon painting project.
