This book is a decent source of information for the person that is interested in learning the very basics of SEO, but lacks specifics for those that are looking to develop strategy. The main reason for this review is because as I was reading this booklet, typos kept jumping out at me. How is one supposed to be considered an authority if they cannot manage basic editing? I was hoping this book would be a real value, instead I got what I paid for.

This book introduces the idea of SEO in right way especially to those who don't know about it very well. Most owners of small or startup businesses simply do not have the resources nor the time needed to become experts in the subject so, to help you out, I have come up with a list of the most common scams, the SEO "claims" that you should be aware of. Please be aware that I am not talking about the claims that are related to paid search results, only the organic, natural results.

It was very educational to know what is the new thing that is going on with the SEO marketing and

the main players like google yahoo ask and all other services that are known to provide services which use SEO as a way of working. The book provides lot of details on how to improve my SEO writing skills and use them to make myself more affluent

I am not really into marketing but I wanted to start my small business online and with the help of this book I was able to learn a lot of things. I was able to learn the whole process and the do's and don'ts. This book shared some practical strategies on how to get boom in business industry. After reading this book, I must say that it is really informative and a great help for a beginner like me in business industry.
